

# **SUBSTANCE ABUSE TREATMENT FACT SHEET**

## **Massachusetts Department of Public Health, Bureau of Substance Abuse Services**

*This fact sheet contains information about the impact of alcohol and other drug use in the Ninth Bristol Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.*

### **Residents of Ninth Bristol Representative District**

#### **Characteristics of Admissions**

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; 3.2% (3,974) of these admissions reside in the Ninth Bristol Representative District. 1% (43) of admissions from the Ninth Bristol Representative District were under 17 years of age.

**Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Ninth Bristol Representative District reported the following characteristics:

- 71% were male and 29% were female.
- 64% were between the ages of 30-49.
- 70% were white non-Latino, 11% were black non-Latino, 12% were Latino, and 7% were other racial categories.
- 64% were never married, 12% were married, and 25% reported not to be married now.
- 41% had less than high school education, 45% completed high school, and 14% had more than high school education.
- 19% were employed.
- 19% were homeless.
- 33% had prior mental health treatment.

#### **Primary Substance of Use**

At admission clients also identify a “primary drug” of use which is the substance currently causing them the most problems. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Ninth Bristol Representative District.

<b>Table 1</b>					
<b>Primary Drug by District and State FY 2002</b>					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	36%	48%	5%	7%	2%
State	45%	37%	6%	4%	3%

#### **Substances Used in Past Year**

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

<b>Table 2</b> <b>Annual Admissions by Substance Used: FY 1995 – FY 2002</b>							
<b>Ninth Bristol Representative District</b>							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
<b>FY '95</b>	2,021	1,617	742	988	241	880	600
<b>FY '96</b>	2,245	1,757	961	1,069	292	1,026	783
<b>FY '97</b>	2,602	1,871	1,029	1,118	222	1,344	982
<b>FY '98</b>	3,131	2,019	983	1,189	284	1,884	1,437
<b>FY '99</b>	2,998	2,114	1,059	1,260	326	1,668	1,274
<b>FY '00</b>	3,374	2,390	1,132	1,517	513	1,921	1,389
<b>FY '01</b>	2,944	1,940	871	1,175	380	1,635	1,182
<b>FY '02</b>	3,974	2,634	1,226	1,633	447	2,222	1,536

### **Heroin and Injection Drug Use**

Figure 1 below shows the proportional increases in all admissions in the Ninth Bristol Representative District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
